*****STAR FEATURES OF THE CHICAGO SUBWAY
*Ventilation *Illumination *Escalators *Safety *Comfort

APPROXIMATELY 3000 Fluorescent lights, each equipped with a 48 inch fluorescent lamp shed their "daylight" into every nook and corner without shadow or glare. It is more pleasant, cooler, easier on the eyes and vastly more efficient than any other light.

Escalators of reversible type are a panacea for that "tired feeling," they connect the mezzanine floor and train platform.

Travel in the Chicago Subway is pleasant and comfortable, speedy and safe.

GENUINE BLACKSTONE PRINT. BLACKSTONE STUDIOS, CHICAGO, ILL.
